## Experience

---

### Frontend Developer Internship | [Certificate](#)

Jun 2024 - Current

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single-page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

### Freelance Frontend Developer

Aug 2024 - Current

Self Employed

- Delivered 3 professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript and React best practises
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world

### Frontend Developer Support

Jun 2024 - Current

Frontend Simplified

- Supported 1,000+ students using HTML, CSS, Flexbox, JavaScript and React best practices
- Utilized debugging best practices using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests

## Projects

---

### Personal Website | [Website](#) | [GitHub](#)

- My personal website highlights my coding skills and contains the source code and website links for all my freelance projects.

### Netflix Clone | [Website](#) | [GitHub](#)

- Fetched data from "TMDB" API to build a highly interactive movie website
- Implemented Firebase for user login and password management

### YouTube Clone | [Website](#) | [GitHub](#)

- Fetched data from Google API to sort video database results on category
- Built using **JavaScript, HTML, and CSS** best practices.

### Disney+ Clone | [Website](#) | [GitHub](#)

- Fetched data from TMDB API to allow users to search the database of movies based on genre.
- Implemented Light and Dark mode.
- Integrated AI using OpenAI API and Microsoft Azure to recommend movies based on genre and selection.

## Education

---
